# KEEPING AN EYE ON EVERYTHING.

## MACHINE INFORMATION SYSTEM (MIS)

### PERFORMANCE DATA AND DAILY REPORT

The Lindner MIS reads out all relevant data straight from the facility's machines and displays them clearly.

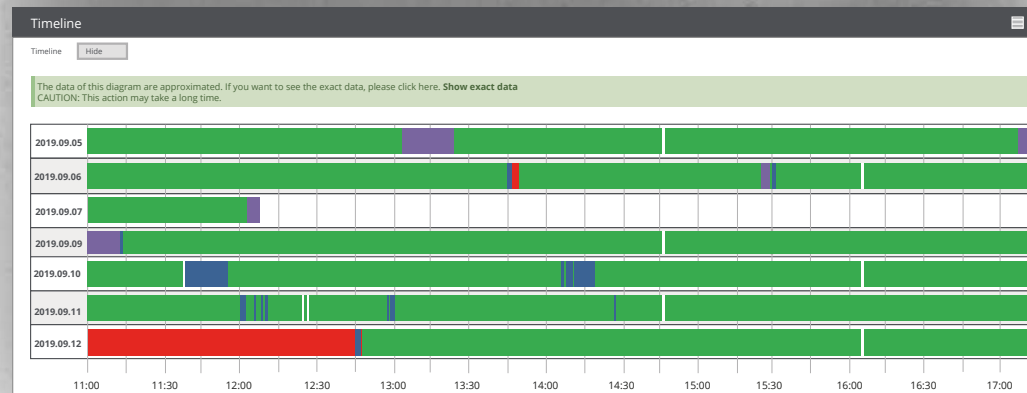

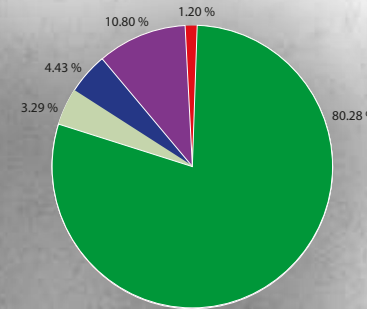

Using the collated data, the software generates daily reports that can be sent via email and shared with employees on noticeboards.

Additionally, the system's long-term analysis makes it possible to identify recurrent errors or trends so that processes can be optimized and productivity increased.

### TRAINING AND MAINTENANCE MATERIALS

With the integrated training videos and short maintenance clips, it's quick and easy to train machine operators and find the right solution.

Designation	Duration	Percent
Production	3412:24:35	80.28 %
Empty run	139:12:27	3.29 %
Interruption	459:41:14	10.8 %
Error from external	51:34:08	1.2 %
Machine off	188:34:01	4.43 %
<b>Sum</b>	<b>4251:53:25</b>	<b>100.0 %</b>

Keep productivity on track: with the right information at the right time, the Lindner MIS puts all relevant performance data and valuable additional information at your fingertips for full transparency, minimum downtime and maximum output.

### EVERYWHERE, EVERY TIME

Our cloud-based system displays all the information on your PC or smartphone app at any time, anywhere.

Furthermore, with the Lindner MIS it's possible to directly request wear and spare parts and view their processing status at any time.

## LINDNER'S MIS AT A GLANCE

- Performance data including reporting
- Provision of daily reports via email
- Request spare parts and see order status
- Integrated training clips and maintenance sequences
- Computer- or smartphone app-operated
- Inbuilt operating instructions
- Database to record performance data and material flows
